FCC Mailroom

Mr. Pai & individuals within the F.C.C,

I will make this letter short and sweet. A 2014 poll by the University of Delaware's Center for Political Communication found that 81% of consumers support net neutrality. So, the plan to gut net neutrality to cater to the whims of 4 major companies (Verizon, AT&T, Charter and Comcast) and ignore the whim of the overwhelming majority of the American people is absurd. I along with millions of others are asking you to **maintain net neutrality provisions** as they already are **or resign**, Mr. Pai.
